

Building Permit#: \_\_\_\_\_

Job Address: \_\_\_\_\_

**What is TUG:**

F.S 166.0484 defines "temporary underground power panel" as a permanent meter base that includes a meter socket, meter, and downpipe, to which power is provided through an underground service line by an electric utility pursuant to its tariffs or service standards, that is permanently attached to a block residential structure, provides temporary power for construction of the residential structure, and is intended for use in providing permanent service to the residential structure upon issuance of the certificate of occupancy.

**Purpose:**

TUG will eliminate the need for temporary poles on sites and allows power to be released to the TUG meter to be used for construction purposes only after passing rough electric inspections.

**Requirements:**

1. Tug details must be shown on the plans at the time of the permit submittal to demonstrate compliance with the National Electric Code article 590.
2. When energized, Panels must be Locked at all times and must be field marked to indicate energized.

**We the Undersigned Agree:**

1. To not energize any feeder, or circuits connected to the premises wiring without specific written permission from the Building Division.
2. Hold the City of Port St. Lucie and their officers and employees harmless from all claims, damages, losses, and expenses that I may incur arising out of or resulting from the failure to comply with the TUG requirement or arising out of or resulting from damage to property due to the negligence or willful misconduct of myself or my Contractor.
