CROSTOWN PARKWAY EXTENSION

City of Port St. Lucie

Starting September 28, 2019

New Configuration at the Floresta Intersection

Facts about the New Configuration:

- U-turns are located approximately 800 feet from the signal at Floresta
- U-turns are signalized with equipment to detect vehicles waiting to make a U-turn onto Crosstown
- Additional turning space added at the U-turn for large vehicles, trailers and other motorist needing extra turning room
- Right turns on red will be allowed from Floresta turning onto Crosstown from the right lane only
- Signals and signage are in place to help maneuver traffic through the intersection

Benefits of the New Configuration include:

- Improving travel time and reducing delays
- Improving safety by reducing drive conflict points by 56 percent
- Reducing pedestrian conflict points by 67 percent
- Fewer, less severe crashes
- Large median refuge island for pedestrians
- Eliminated conflict between pedestrians and left-turning vehicles
